SUMMARY

Seasoned SaaS specialist with expertise in technical problem-solving and cross-team coordination, dedicated to enhancing product innovation and delivering outstanding user experiences.

EXPERIENCE

Senior Technical Support Engineer 04/2025 - Present
FinThrive ↗

- Led support efforts for an advanced SaaS platform, ensuring timely resolution of product and technical challenges.
- Investigated and resolved product and technical issues across multiple environments (production, audit, and lower tiers) using tools and technologies such as SQL, C++, Angular, ASP, and .NET (C++ and SQL majorly).
- Played a signifcant role in enhancing a SaaS product by managing sensitive data, complying with regulations, and documenting defects and processes for continuous improvement.
- Worked closely with developers, project managers, and clients to refine product features and effectively prioritize backlog items.
- Identifed bugs, root causes, and areas for improvement, contributing to increased product efciency and functionality.
- Acted as a Subject Matter Expert (SME) for the product, providing insights into its capabilities, market competition, and industry developments.
- Utilized deep product and technical expertise to address customer queries, resolve escalations, and overcome product-related challenges efciently.
- Facilitated client meetings and led requirements-gathering sessions, ensuring alignment between technical teams and end-user needs.
- Served as a bridge between technical teams and non-technical stakeholders, simplifying complex technical concepts to promote clear communication and organizational alignment.
- Led end-to-end investigation of customer-reported incidents and enhancement requests through Salesforce, performing root cause analysis, debugging frontend and backend code, validating data integrity, and ensuring timely resolution of complex production issues.
- Working in US time zone shifts and participating in 24×7 on-call support, ensuring timely resolution of production incidents and maintaining application stability.

Technical Support Engineer 04/2022 - 03/2025
FinThrive ↗

Associate Technical Support Engineer 08/2020 - 03/2022
FinThrive ↗

Intern Developer 05/2019 - 05/2020
MetricStream ↗

- Developed and maintained responsive React web pages based on customer feedback, enhancing user experience and meeting specifc client requirements.
- Expertly identifed and resolved bugs and issues at both the frontend and database levels, improving the overall stability and performance of the production instances.
- Worked closely with cross-functional teams to ensure seamless integration and functionality of new features and updates.
- Demonstrated proactive problem-solving skills by identifying potential issues before they became critical, maintaining high uptime and reliability for production instances.
