Work Experience

Software Engineer

Finthrive

August 2020 - Present
Gurgaon, Haryana, India

As a software engineer at Finthrive, a product-based **healthcare revenue management** company, I actively contribute to the development of new web pages, components, and routes using React.js. Alongside, I provide crucial support for frontend, backend, database issues, ensuring a seamless software experience.

My role extends to the backend, utilizing VS 2017 to debug complex C++ code, including SQL for database level problem solving, and address root causes of issues.

Technologies/Tools In Use : React.js, SQL, C++, Visual Studio 2017.

Intern - Developer

MetricStream

May 2019 - May 2020
Bangalore, Karnataka, India

At MetricStream, a product-based company specializing in **Governance, Risk, and Compliance** software solutions, I was responsible for maintaining the production instances of the software primarily at the frontend and database levels.

I worked closely with the team to develop and create React web pages based on customer's feedback, while using SQL to manage the database. Additionally, I was adept at resolving bugs/issues at the frontend and database levels.

Technologies Used : React.js, SQL, JS.

Education

2016 - 2020

Chitkara University

Computer Science Engineering (8.54 CGPA)

Skills

React.js | Redux | C++ | C | JavaScript | SQL | HTML/CSS | Data Structures and Algorithms | Git
